Unique Selling Proposition

Price Charts

PinkVote offers real time price charts and useful indicators like the last hour price change, last 24 hours price change, minimum and maximum price in the last 24 hours. It also offers token indicators like the burned, circulating and total supply of the tokens..

Airdrops

The platform manages the organization of crypto airdrops. It provides quality airdrops from the most recent crypto projects. Users can navigate its list of current, upcoming, and closed airdrops. It's a great chance for the users to earn coins without any risk.

NFTs

PinkVote´s NFT Marketplace brings together artists, creators, and crypto enthusiasts on a single platform to buy, sell and discover rare digital items and crypto collectibles. PinkVote contains a unique collection of masterpieces created by artists around the globe.

Unique Selling Proposition

UpVote

PinkVote offers real time Voting charts and useful indicators like

- Verified contract code
- Owner Privileges
- StaySAFU scan
- Auto rug Check
- Bubblemap

Portfolio

The portfolio tracker allows users to watch profits, losses and portfolio valuation with an easy-to-use platform. This allows retail investors to make more informed decisions about which projects to invest in for a balanced crypto portfolio.
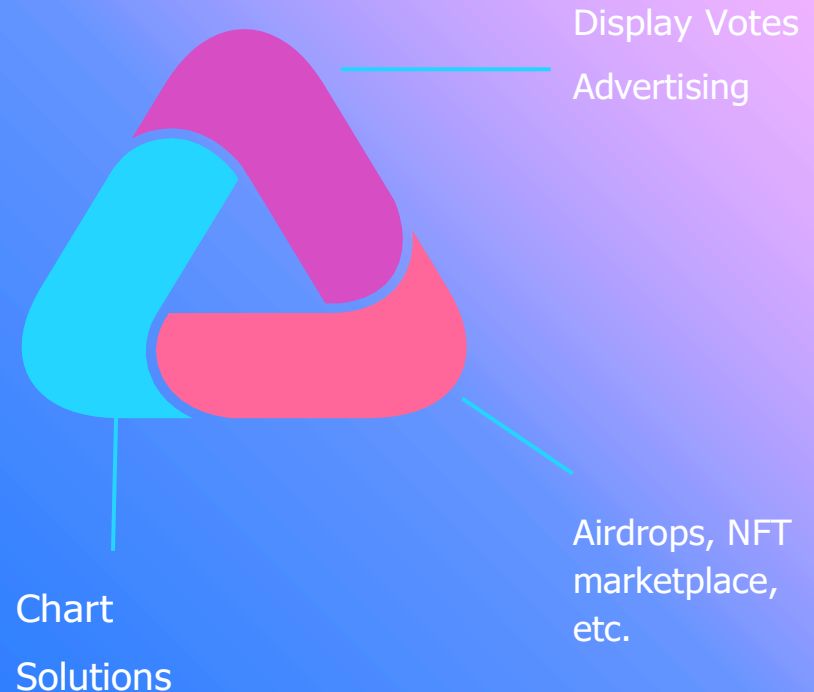

Blog / Newsletter

PinkVote is covering the latest cryptocurrency news, crypto trading, investment and information around the world. Its first priority is to spread the D.Y.O.R. principals, so it provides guides on how to investigate, buy and track cryptocurrency assets.

Business Model

PinkVote business model is using display advertising, auditing services and a variety of innovative offerings like airdrops or a NFT marketplace to generate revenue.

PinkVote is leveraging its high-traffic website and the in-house expertise of its security experts to bring high potential new crypto projects to the market.

Current Growth

Growth Opportunities

PinkVote aims to stay true to its mission and become the leading website for helping new investors become familiar with new crypto tokens and discover new investment opportunities.

PinkVote will be launching its native token [PIT] that will allow users to get access to exclusive NFT launches, exclusive content and early access to new features.

[PIT] Token holders will receive priority service and purchasing services with [PIT] will be discounted. The tokens used are burned manually by the team in order to intervene in a deflationary manner and thus force an increase in value.

PinkVote Native Token

Educational Content for its users for more informed decisions

Affiliate Partnerships with major exchanges

FAQs

FAQs

- **How do I buy Pinkvote's Token?**

PinkVote will be launching its token in the Binance Smart Chain network (BSC) as a presale on 15th of April. You can find instructions on how to buy the token here:

- Pinksale: https://www.pinksale.finance/launchpads?chain=BSC

- **What slippage should I use?**

Slippage is the difference between the expected price of a trade and the executed price of that trade. When a new token is launched the price volatility can be quite high, so is hard to predict the exact number. We've seen that slippage in the range of 1% should work for most traders.

FAQs

- **What do we know about the team?**

The team consists from 15 experienced blockchain developers and marketeers who are based in various places around the world varying from UK, USA, Indonesia and more.

- **What makes PinkVote token a good investment?**

Pinkvote is a solid 2-month project that has more than over 50K registrated users. Due its unique position in the market PinkVote team has analysed thousands of token launches. This has provided insights on what makes a crypto token successfuland what it takes a project to hundreds of millions in market cap. The team will be using these insights and the successful marketing tactics used to launch its own native token and take a step closer to realising itsvision.

FAQs

- **What is PinkVote's marketing strategy?**

Pinkvote has amassed a huge user base of more than 50.000 users over the past 2 months. It will be using a mix of strategic ads on Facebook Groups, twitter and subreddits. It will also be launching NFT giveaways, airdrops and email marketing to raise awareness.

Having analysed thousands of token launches and marketing strategies from other projects PinkVote will be using a marketing mix that will bring the best ROI to its investors.

- **Is my investment SAFU?**

PinkVote will make its contract available for all investors to inspect during the presale. The contract will also be audited by in-house and independent crypto security experts. LQ is also Locked by Pinksale.

FAQs

-   How can I help?

To help make PinkVote the biggest token launch of the year, help us withby spreading the word. Tell your friends, your family and your neighbours and let's take it to the moon!   🚀
